

Crystal Butterfly

Description

Mass-produced version of the boss Moonlight Butterfly.

Location

Crystal Cave

Perching on top of the crystal spires in the cave.

Playthrough	HP	Souls
First	1,255	400
NG+	1,970	800
NG+7	2,462	1,000

Drops

- Blue Titanite Chunk - rare
- Blue Titanite Slab - very rare

These drops are automatically added to your inventory if they are dropped, so you don't need to worry about fighting them over a chasm.

Attack Pattern

- Homing magic attack
- Light needles attack

Strategy

- These enemies have small aggro radius, so they will not attack you first in any normal Crystal Cave run.
- They fight like the Moonlight Butterfly, only they don't land, making them an entirely ranged fight.
