Damage:	<p>The Damage stat dictates how much damage the weapon does. The Damage stats for a bow or crossbow are W / X / Y / Z:</p> <ul style="list-style-type: none"> W is Physical Damage X is Magical Damage Y is Fire Damage Z is Lightning Damage <p>Damage is further modified by the types of arrows or bolts used.</p>
Range:	<p>The Range determines the maximum distance an arrow or bolt can be fired. Damage will decrease proportionately with the Range stat the further the arrow/bolt travels.</p>
Durability:	<p>The durability of the weapon. The effectiveness of the weapon will severely deteriorate when the durability falls below 30%.</p>

Weight:	The weight of the weapon. Note that carrying over 50% of user's Equip Weight will reduce the speed of their rolls, while going over 100% will reduce their regular speed to walking and attempts to roll or backstep will leave them momentarily stunned.
Requirements:	<p>The Requirements determines how high various Stats must be in order to wield the weapon effectively. The Requirement stats for an weapon are W/X/Y/Z:</p> <ul style="list-style-type: none">• W is the Strength required• X is the Dexterity required• Y is the Intelligence required• Z is the Faith required <p>Wielding a weapon without the required Strength and/or Dexterity will incur a penalty to the Physical damage of the weapon, while lower-than-required Magic and/or Faith will reduce the Magic damage of the weapon.</p> <p>Also keep in mind that the player character gains a 50% bonus to Strength by wielding a weapon with both hands, thus reducing the actual Strength required. For example, a character with 18 Strength can wield a Great Axe (Requires 26 Strength) properly if she holds the weapon with both hands ($18 \times 1.5 = 27$).</p>
